# Using Destinations

To open the Destinations window:

1. From the menu bar, select **Phone**.

2. From the drop-down list, select **Destinations**.

    The **Destinations Phone Selection** dialog box appears.

    If you already select call data, the phone number appears automatically. Otherwise, you must enter it manually.

3. Enter the MIN for which you want to list destinations—do not use dashes—and select **OK** to view the **Destinations** window.
